TECHNICAL SPECIFICATIONS:

System uses multiple technology approached to come up with a stable and more secured system environment.

- PHP with Laravel 10.0 Framework
- MariaDB 10.3+
- PHP 8.2+
- jQuery
- Ajax
- HTML 5 Bootstrap
- JavaScript
- CSS3

SECURITY PASSING RATE AT:

Header Intrusion Security have been tested several times for any possible vulnerability attacks.

PROGRESSIVE WEB APPLICATION TECHNOLOGY

The site doesn't require users to download the application across App store platforms (i.e. Google Play store, Apple Store, and Microsoft Store). It can be installed in less than Five(5) seconds on each user device. The web application platform will be the mobile and tablet application itself. As part of the ongoing technological advancement, this function also helps client to reduce the cost in engaging mobile application development.

HOSTING SERVICE:

With our hosting partner's Blazing-fast hosting makes a better page at 1.23 seconds full page load time, we will give your platform one of the fastest web hosting providers in the U.S.. Faster hosting means a smoother visitor experience and results in fewer visitors leaving your page early. Comparison made over 30 days from April 26, 2023 to May 26, 2023 with TeamViewer Web Monitoring. Loading times based on servers located in the U.S.. We compared our web hosting, Linux Expert plan against comparable plans. With Our Hosting partner's Georedundant Infrastructure, it will make your platform online with 99.9% uptime. Your data is mirrored in two data centers to keep hosting uninterrupted even during maintenance and outages. You will be equipped also with the latest Content Delivery Network, where our hosting partner servers has 150 locations globally that can reach your possible customers at any point of place.

Hosting Features:

Domain Name:	Inclusive ICANN Registered
Database:	Unlimited MariaDB 10.3
Web Space:	Unlimited SSD
CPU & RAM:	Performance level 5 of 5: Optimized for up to 500 visitors per minutes on your websites (896 MB PHP memory, up to 19 GB RAM).
Professional Email:	5 user mail free + Optional Add-ons at 50GB storage per mail user
Daily Backup:	Inclusive
Wild Card SSL:	Geotrust Premium SSL Inclusive

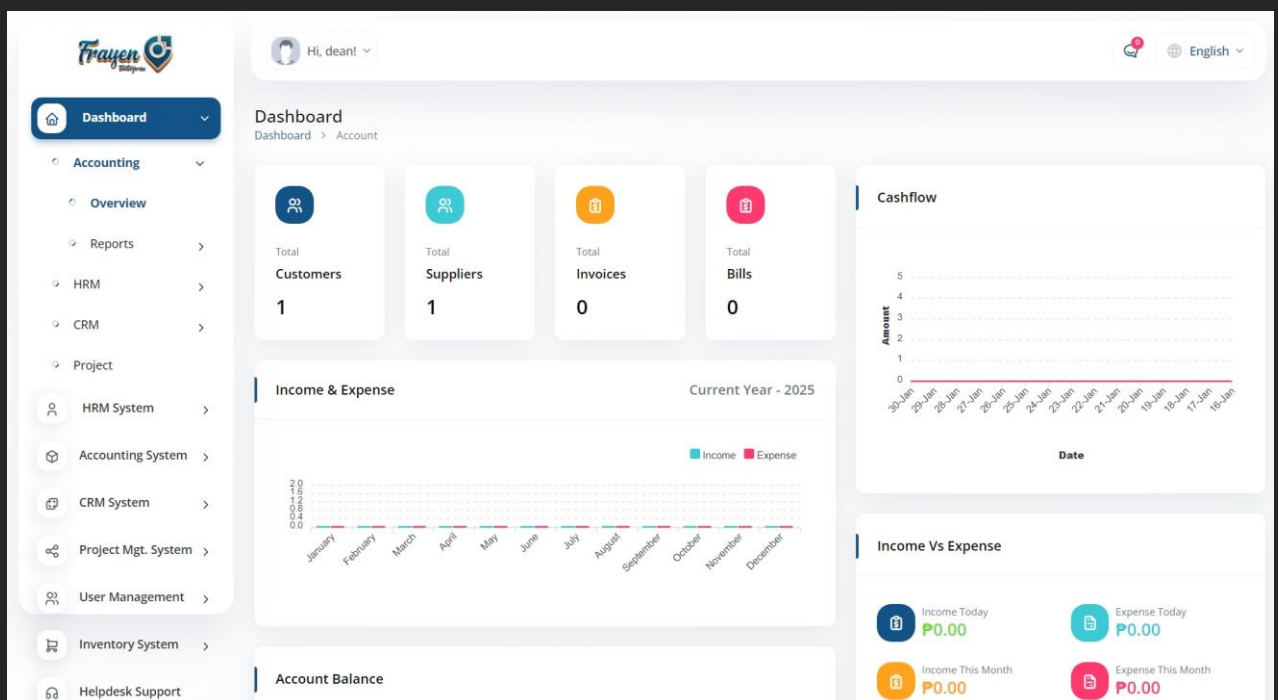

SMS & MAIL NOTIFICATION SERVICES:

System is capable of supporting included Mail and optional SMS notification services depending on client's SMS provider.

THE DASHBOARD:

FE WebERP has the most comprehensive dashboard with all the essential details under one head. We all can agree that dashboards have made our lives easier. Well, from every minute detail like total Clients, Users, Invoices, Projects, and estimations to Leads, Deals, and items, you can get quantitative data in the most simple layout. You get an overview of Estimates, Invoices, top-due Payments, Projects, and Tasks to take timely actions. Get a reminder of meeting Schedules, Expiring Contracts, Weekly Events, and new clients as you scroll down. Lastly, a Pie Chart can help you understand various project statuses. In short, every activity of your business can be handled through this useful tool.

The Manage Inventory Stocks page displays a table of inventory items. The table has columns for NAME, SKU, CURRENT QUANTITY, and ACTION. The data shows two items: FMB125 and Teltonika Dual-cam.

NAME	SKU	CURRENT QUANTITY	ACTION
FMB125	FMB125BJ0B01	130	+
Teltonika Dual-cam	PMC225F32F01	105	+

Showing 1 to 2 of 2 entries

STAFF MANAGEMENT:

Manage your Employee and Client’s personal as well as company details through easy-to-create options. You can edit and manage the information and status at your convenience. You can search for staff through easy filter options based on department and designation.

STAFF DAILY ATTENDANCE:

Manage your Employee’s Daily attendance report at any location. The module will consolidate your employees’ attendance with the Human Resource System and Accounting System, in order to obtain a smooth end of the month payroll reports.

EMPLOYEE MANAGEMENT:

Through a detailed HR section, you can manage Attendance, Bulk Attendance, Holidays, Leaves, Meetings, Assets, Documents, and Company Policies. Create, Edit, and Filter at your convenience. You get a detailed understanding of each aspect of the employee. You can also manage Awards, Transfers, Promotions, Complaints, and many such HR aspects of employees with easy tabs. The Training and Performance of each employee can be planned, handled, and taken care of.

LEADS MANAGEMENT:

You can view all the generated leads through a List view. Create pipelines and assign stages to various leads. You can manage the leads by adding Users, Items, Files, Notes, Sources, Call Details, Emails, and Discussions. Get all the requisite information on any particular lead in an easily laid layout.

DEALS MANAGEMENT:

Just like Leads Management, you can view deals in List view. Get an overview of deals in a week, month, and deals in the last 30 days. Assign Tasks, Products, Files, and Users for each deal. Manage discussions and notes. Also, get a calendar view for every deal detail. In short, deals management has never been easier.

DOUBLE ENTRY MODULES FOR ACCOUNTING:

The Double Entry module within FE WebERP is the cornerstone of robust financial management, comprising six crucial columns. The "Chart of Accounts" column lays the foundation, offering a comprehensive view of account details, including codes, names, types, journal and transaction balances, and status. "Journal Account" records specific transaction details, while the "Ledger Summary" column provides historical snapshots of account balances. The "Balance Sheet" column facilitates the creation of this vital financial statement. Additionally, the "Profit and Loss" section generates income statements, and the "Trial Balance" ensures the accuracy of the entire accounting system by reconciling debit and credit balances. This module empowers organizations to maintain precise financial records, track transactions, and produce essential financial reports, fostering transparency, compliance, and informed decision-making.

Double Entry	CODE	NAME	TYPE	BALANCE	STATUS	ACTION
Chart of Accounts	120	Accounts Receivable	Current Asset	-	Enabled	  
Journal Account	160	Computer Equipment	Fixed Asset	-	Enabled	  
Ledger Summary	150	Office Equipment	Fixed Asset	-	Enabled	  
Balance Sheet	140	Inventory	Inventory	-	Enabled	  
Trial Balance	857	Budget - Finance Staff	Bank & Cash	-	Enabled	  

SALES MANAGEMENT:

Manage various aspects of sales like sending Invoices, making Payments, managing Expenses, and Credit Notes in a single tool. You can create new invoices and edit existing ones. Add new products and receipts to existing Invoices, edit Payments and Products. Resend the Invoices, send the payment reminders, and print the Invoices simply in a click. Similarly, you can manage Payments, Expenses, and Credit Notes with the utmost ease. All in all, keep all your sales fears at bay.

INVENTORY MANAGEMENT IN INVOICE BILL:

Isn't it effortless to check the inventory status of each of the items you are using for your business activities? Sounds Fascinating!
Here, through the inventory management feature, you can monitor the inventory of each item you have registered with you. After generating the Invoice/ Bill, the quantity will automatically be updated in "Product & Services" for scrutiny. Overall, it is painless to maintain the inventory level of the products.

CUSTOMER VENDOR STATEMENT REPORT:

With the help of this "Customer/ Vendor Statement Report" Module, you can review the filtered particulars of that customer/ vendor for a certain period. This statement report includes the start and end dates, order details, and payment details along with the transaction history with the customer/ vendor.

3RD PARTY CROSS-PLATFORM INTEGRATIONS:

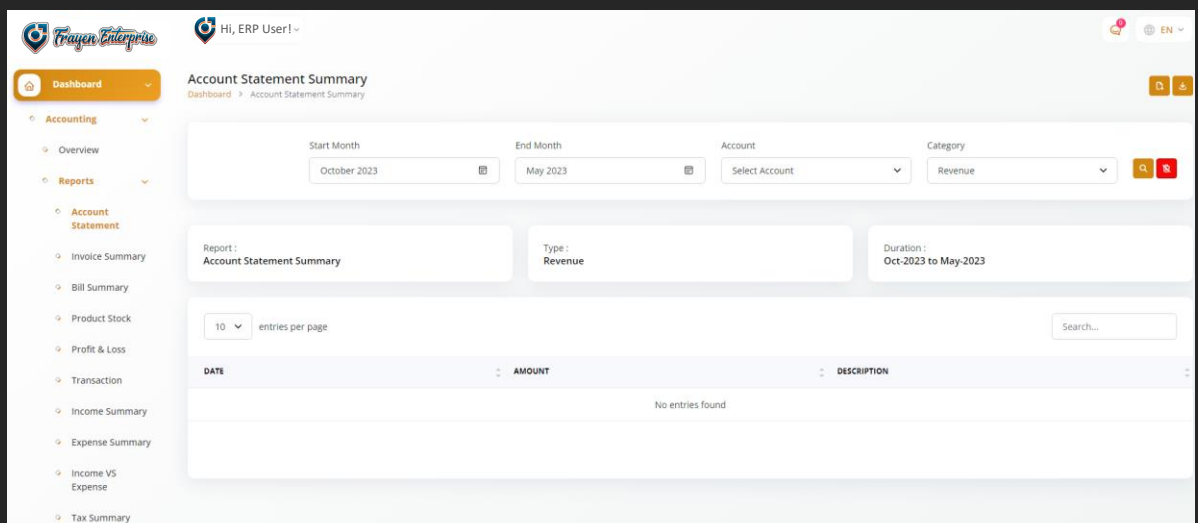

Receiving instant notifications of the company's activities is one of the trouble-free ways to keep a tap on them. With the help of CROSS-PLATFORM Integration, you can get insight into the major actions through the specific channels and when they are performed. It also helps you to schedule the messages for future dates. Rectifying mistakes is also not burdensome.

- EMAIL INTEGRATION
- SLACK INTEGRATION
- TELEGRAM INTEGRATION
- TWILLIO INTEGRATION

REPORTS:

Management shall go to waste if its result cannot be seen in reports. You can get a detailed report in the form of Graphs for Tasks, Time Logs, Financial Details, and Incomes/ Expenses. You can filter and search for reports for a specific time. Also get a detailed report of Leaves, Estimates, Invoices, and many similar aspects.

The screenshot shows the Frayen Enterprise ERP User interface. The top navigation bar includes the Frayen Enterprise logo, a user profile icon, and a language dropdown set to EN. The left sidebar contains a menu with categories like Accounting, Overview, Reports, and various summary reports. The main content area is titled "Account Statement Summary" and includes filters for Start Month (October 2023), End Month (May 2023), Account (Select Account), and Category (Revenue). Below these are fields for Report (Account Statement Summary), Type (Revenue), and Duration (Oct-2023 to May-2023). A table with columns DATE, AMOUNT, and DESCRIPTION is shown, but it contains no data, with a message "No entries found" at the bottom.

RATES & PACKAGES
